## Frequently Asked Questions

### How do you track the 30-day purchase window?

Clicking through your affiliate link activates a 30-day site cookie. A cookie is a tracker that helps us determine who sent a referral to our site (aka you.) Even if your referral doesn't make an immediate purchase, any purchase they make during that 30-day period counts towards your earnings.

Additionally, we offer a 30-day cart cookie. This means that when visitors add products to their cart, there is an additional 30-day purchase window on top of your site cookie—from the day the product is added.

### How do affiliate earnings work?

Affiliate commissions are paid on the final base price of a product. If an artist has set a markup on the product, you will only be paid a commission on the base price. If a product is on sale, the commission will be paid on the final sale price.

There is a 30-day grace period for all orders to clear from the time of sale. Any items returned in that window will not count towards your earnings.

### Where can I find my unique link?

Once you are approved, your affiliate link can be found on any product page under the product description. You can copy that link and share anywhere you would like! If you want to share a collection or a direct link to your artist shop simply add your unique affiliate code, **?curator=yourusername**, to the end of the URL.
