ABOUT TRADING CREDIT

FORWARD WITH YOUR TRADING, EASY ON THE FEES

When you refer someone through your Swissquote account, you receive a reward in Trading Credit—a virtual amount of varying value available in your account to reduce trading fees.

Whenever you make a trade, the fee is automatically deducted from your Trading Credit.

Be aware of the risk

Trading leveraged products on the Forex platform, such as foreign exchange, spot precious metals and Contracts for Difference (CFDs), involves significant risk of loss due to the leverage and may not be suitable for all investors. Prior to opening an account with Swissquote, consider your level of experience, investment objectives, assets, income and risk appetite. Losses are in theory unlimited and you may be required to make additional payments if your account balance falls below the required margin level and therefore you should not speculate, invest or hedge with capital you cannot afford to lose, that is borrowed or urgently needed or necessary for personal or family subsistence. Over the past 12 months, 74.54% of retail investors have either lost money when trading CFDs, experienced a total loss of their margin at the closing of their position or ended up with a negative balance after closing their position. You should be aware of all the risks associated with foreign exchange trading and seek advice from an independent financial advisor if you have any doubts. For more details, including information on the leverage effect, how margins work, and counterparty and market risks, please refer to our [Forex and CFD Risk Disclosure](#).
